

About

These classes are drop-in replacements for the default Xojo components.

Additions

Properties

`Immersive as Boolean = True`

This property controls whether the color values will be modified to match the current system theme.

Applies to:

- `GraffitiImmersiveLabel`
- `GraffitiImmersiveTextArea`
- `GraffitiImmersiveTextField`

Events

`AppearanceChanged`

This event is raised on load and when the user changes the system theme. Applies to Windows and macOS.

Applies to:

- `GraffitiImmersiveCanvas`
- `GraffitiImmersiveWindow`

How to Implement

Simply change the super of the default Xojo component instance to the matching `GraffitiImmersive` class name.

GraffitiImmersiveApp

If you see the following error, you need to either change your App object's Super to `GraffitiImmersiveApp` or remove the `GraffitiImmersiveApp` class from your project. This class can be found in the IDE's navigator at `GraffitiSuite > gsImmersive > GraffitiImmersiveApp`

You may only have one direct application subclass in a project at the same time
