

## Finding your GraffitiSuite Version

### Release 30+

Release 30 and beyond stores the version information in a Constant of each GraffitiSuite class/window/module/container/etc. This constant is named `GraffitiSuiteVersion`, and will have a value such as R30 for final releases, R30A1 for alpha releases, R30B1 for betas, and R30RC1 for release candidates.

You may also find the [VersionTracker](#) local copy of the change logs for Desktop and Web in the root of the ZIP archive.

### Before Release 30

Prior to Release 30, then only way to tell which version of GraffitiSuite you were using was to follow these steps:

1. Open the downloaded demo project
2. Expand the App object
3. Expand Notes
4. Select ChangeLog
5. The first line is the version number.
