

Enumerations

Name	Values
	This class exposes no enumerations.

Constants

Name	Type	Value
		This class exposes no constants.

Events

Definition	Description
	This class does not expose any events.

Methods

Definition	Description
Constructor(sLabel as String , cFill as Color , cStroke as Color , cHighlightFill as Color , cHighlightStroke as Color , cPoint as Color , cPointStroke as Color , cPointHighlight as Color , cPointHighlightStroke as Color , DataPoints() as Double)	Creates an instance of this class with the parameters as property values.
Constructor(sLabel as String , nValue as Integer , cFill as Color , cHighlight as Color)	

Properties

Name	Type	Default Value	Description
Data()	Double	Nil	The values of each datapoint for applicable chart types.
DatasetValue	Integer	0	The value of the dataset for applicable chart types.
FillColor	Color	&c000000	The color used to fill the dataset on the chart.
HighlightFill	Color	&c000000	The color used to fill the dataset on the chart when the mouse is hovering on the dataset.
HighlightStroke	Color	&c000000	The color used for the dataset's stroke on the chart when the mouse is hovering on the dataset.
Label	String	""	The label of the current dataset.
PointColor	Color	&c000000	The color used to draw the background on the data point.
PointHighlightFill	Color	&c000000	The color used to fill the data point when the mouse is hovering on the data point.
PointHighlightStroke	Color	&c000000	The color used for the data point's stroke when the mouse is hovering on the data point.
PointStrokeColor	Color	&c000000	The color used to stroke the data point.
StrokeColor	Color	&c000000	The color used to stroke the dataset.

Examples

There are currently no examples for this class.
