

Enumerations

Name	Values
	This class exposes no enumerations.

Constants

Name	Type	Value
		This class exposes no constants.

Events

Definition	Description
Click(X as Integer, Y as Integer, pageX as Integer, pageY as Integer)	Raised when the user clicks the label. X/Y are relative to the label's left/top.
ContextClick(X as Integer, Y as Integer, pageX as Integer, pageY as Integer)	Raised when the user right-clicks the label. X/Y are relative to the label's left/top.
LinkClick(linkID as String)	Returns the defined ID for an HTML link inside the contents. See examples below.
Resized	Event is fired when the Label's automatic height has been adjusted to fit inner contents.
MouseEnter()	Raised when the user moves their mouse in to the label.
MouseExit()	Raised when mouse leaves the label.
SelectionChange()	Raised when the user makes a selection of the label's content.

Methods

Definition	Description
	This class exposes no methods.

Properties

Name	Type	Default Value	Description
Caption	String	"Untitled"	The caption to draw within the label. May contain arbitrary HTML or FontAwesome icons in the form of <fa-apple>.
MaxHeight	Integer	100	Maximum pixel height of the label. Upon reaching the MaxHeight value, scrollbars will be shown for the contents.
SelectedHTML	String	""	When the user selects a portion of the label's content, and the SelectionChange event fires, the content of the selection will be available in this property as HTML.
TrueHeight Read-Only	Integer	0	The true height of the label after the resize operation to fit contents has completed, but before the Resized event has fired.

Internal Links

Last update: **2019/10/23 05:53**

To add internal links to your label's content, you should use the following format in the Caption property:

Some awesome text!

`
`

`And a link!`

Notes

LockBottom

Explicitly setting the height after load can cause unexpected behavior. If you wish for the label to auto-resize with the height of the contents, then you should never set LockBottom = True.
