This class exposes no constants.

Events

Definition	Description
------------	-------------

This class exposes no events.

Methods

Definition	Description
AddPage(container as WebContainer)	Adds a page to the PagePanel.
Container(index as Integer) as WebContainer	Returns the page at index.
Count() as Integer	Returns the number of pages currently added.
InsertPage(atIndex as Integer, container as WebContainer)	Inserts a WebContainer at the given index.
RemoveAll()	Removes all pages from the PagePanel and calls Close on the associated WebContainers.
RemovePage(panelIndex as Integer)	Removes the specified page from the PagePanel and call Close on the associated WebContainer.

Properties

Name	Type	Default Value	Description
Value	Integer	0	The currently selected page.

Examples

Adding a Panel

GraffitiWebPagePanel expects that the WebContainers you wish to use as panels are already embedded in the page. You can do this at design-time or at runtime. Once your WebContainers are

present on the page, you need only call one of the methods to add the WebContainer to GraffitiWebPagePanel as a panel, such as (assuming you've named your WebContainer newContainer):

```
GraffitiWebPagePanel1.AddPage( newContainer )
```

Notes

This class currently has no notes.
